Senior Software Engineer

Experienced and versatile engineer and technical leader, specializing in native iOS. Significant experience in Dev-Ops infrastructure, provisioning and administering Linux systems, network configuration, and front-end web. I have a passion for solving tough problems and writing clean, modular, robust code.

WORK EXPERIENCE

Seasoned • San Francisco, CA • June 2022 - January 2023
Senior iOS Engineer
- Authored cohesive, organized code to maintain a clean and extensible codebase
- Learned the nuances of GraphQL and SwiftUI on an accelerated timeframe to develop new features for data interchange and UI presentation.
- Emphasis on beautiful custom UI widgets and animations.

PatientSafe Solutions • San Diego, CA • February 2016 - April 2021
Senior Software Engineer / Platform Engineer
- Contributed to iOS client apps that provide clinical workflow management, patient assignments, secure messaging and VoIP.
- Developed and maintained a continuous integration system to greatly streamline the local distribution of builds for QA, as well as automate submissions to Testflight, the App Store, and Google Play.
- Built and managed server deployment/orchestration systems to automatically install, configure, update and manage complex server environments.
- Served as go-to technical resource and troubleshooting expert; routinely diagnosed and resolved technical issues and outages in high-stakes hospital environments.
- Provided onboarding, mentorship and technical leadership to junior team members.

NTENT • Carlsbad, CA • February 2015 - February 2016
Software Engineer
- Contributed to a full-featured iOS web browser leveraging NTENT's unique search technology.

SeeScan • San Diego, CA • December 2013 - February 2015
Software Engineer
- Served as sole iOS Engineer in the entire company; drove the development of native iOS and web applications to support R&D efforts.
- Developed consumer-facing applications that collated sensor data from the iOS device and proprietary hardware, generating reports and maps for end-users.
